FOR

MARKET GARDENERS

4960

TETHER SEED CO., INC.

47-49 Fair Street - - - Paterson, N. J. Phone: SHerwood 2-2130

To Our Market Garden Friends:

We take pleasure in sending to you our new Market Garden Catalogue We do not compete with and are not dealing in cheap, poorly grown Stocks, but aim to supply Seeds of known purity, produced by careful selection and painstaking care from pedigreed Seed Stock, believing that our seeds are our best advertisement.

This list Cancels All Previous Offers.

DAYS: In listing the number of days from planting to marketable condition, we have used the average results secured over a period of years. These figures apply to planting under normal conditions, but the number of days indicated will serve to show the relative maturity of the different varieties.

All goods in this Catalogue are offered subject to being unsold on receipt of order and the prices are subject to change without notice.

TERMS:

Bills rendered to regular customers or parties of approved credit from January 1st up to June 1st are due on July 1st. After June 1st all goods are sold on thirty day basis.

When cash accompanies order, 5% discount may be deducted from catalogue prices on seeds only.

DISCLAIMER

TETHER SEED CO., Inc. warrants to the extent of the purchase price that seeds sold are as described on the container within recognized tolerances. We give no other or further warranty express or implied.

DILL

DILL	
1 oz. will sow a 230 ft. row; 5 lbs. per acre	
1 oz. $\frac{1}{4}$ lb. 1 lb.	10 lbs.
Long Island Mammoth \$.20 \$.45 \$1.40	\$13.50
Leaves and seed clusters are used in pickles, preserves, soups and sauces. Plant about 2 to 3 feet tall. Seed clusters form in about 70 days.	
EGG PLANT	
1 oz. will produce 1,000 plants; $\frac{1}{2}$ lb. per acre	
1 oz. 1/4 lb.	1 lb.
Black Beauty \$.90 \$2.75	\$ 9.00
Plants thrifty, 24 to 28 inches tall, commonly bear 3 to 6 large fruits per plant. They are smooth, broad, egg-shaped, uniform, very rich dark purple, retaining color a long time. Matures fruit 80 days after plants are set in the field.	
Florida High Bush	10.00
A hardy variety showing resistance to drought and root rot. Plants 32 inches tall, upstanding, holds fruits off the ground. Fruits 9 to 10 inches long, 5½ to 6½ in diameter, nearly egg shaped, broadest near blossom end. Color deep purplish black and high gloss. 85 days after setting plants in the field.	
ENDIVE	
1 oz. will plant 150 ft. row; 4 to 5 lbs. per acre	
1 oz. $\frac{1}{4}$ lb. 1 lb.	10 lbs.
Full Heart Batavian \$.25 \$.80 \$2.50	\$24.00
Also known as Escarolle. Plant medium large, very deep, of upright growth, with a dense mass of thick, slightly crumpled leaves strongly bunched to give a well blanched heart. An excellent market garden strain. 71 days.	
Florida Deep Heart	24.00
The plants are large, with very deep, well filled hearts that blanch clear creamy yellow. Outer leaves turn upward making plants less susceptible to bottom rot.	
Deep Heart Fringed	24.00
Between Full Heart Batavian and Green Curled White Rib in leaf type, but more upright in growth than either. Outer leaves turn upward, making plants less susceptible to bottom rots than most endives. Extra deep, well filled hearts blanch to clear creamy yellow. 72 days.	
Salad King	
It is a green curled Ruffec or White Rib type selected specifically for its non-bolting characteristic. It has the ability to hold under adverse weather conditions for ten days to two weeks longer than other curled Chicory. Endives, when subjected to sudden frost or other adverse weather conditions, will bolt almost immediately. The plant is a very deep hearted and is almost a third larger in diameter than regular type green curled varieties.	
Green Curled Pink Rib	24.00
A large late vigorous sort. Plant medium green with curley, deeply cut leaves. The crowded foliage, dense at the center, readily blanches itself. The mid-ribs or leaf stem is tinged with rose. Also known as chicory in local markets. 76 days.	
Green Curled, White Rib (Reffec)25 .80 2.50	24.00
Plant large, 18 inches in diameter, tufty and full center. Leaves have deeply cut margins and curly. Mid-rib is pale green, thick, tender and fleshy. Heart blanches well in late summer and fall. 76 days.	
President, Giant Green Curled25 .80 2.50	24.00
The largest of all chicorys, measuring 22 to 24 inches across. Very hardy and withstands fall rains and early freezes. Has a dense and full heart, easily and quickly blanching, and is very fine curled. Has a green rib and is remarkably even. Does not	
burn as easy as white rib.	

FENNEL	
1 oz. will plant 75 ft. row; 8 to 10 lbs. per acre	
1 oz. 1/4 lb. Florence (Finocchio)	1 lb. \$ 3.00
Plant 2 to 3 feet, with broad overlapping stalks similar to celery stalks but forming a flat-oval, bulblike enlargement at the base of the stem.	
KALE	
1 oz. will plant 500 ft. row; $\frac{1}{4}$ lb. per acre	
1 oz. ½ ib.	1 lb.
Dwarf Curled Scotch	\$ 3.00
KOHLRABI	
1 oz. will plant 200 ft. row; 4 lbs. per acre	
Early White Vienna Short Leaf \$.35 \$1.00	1 lb. \$ 3.50
Produces bulbs 2½ inches in diamete 55 to 60 days after seed	ф 3.30
is sown out of doors. Plants small, leaves medium green. Bulbs flattened globe-shaped, pale green, used when 2 to 2½ inches in diameter, but grow much larger, interior white, mild, crisp and tender.	
LEEK	
1 oz. will plant 200 ft. row; 4 to 5 lbs. per acre	
1 oz. $\frac{1}{4}$ lb.	1 lb.
American Flag	\$ 6.00
Musselburgh	6.00
Long white stem with blue-green leaves, longer than American Flag. Can stand over winter when climate is not too severe. 150 days.	
LETTUCE	
1 oz. will sow 150 ft. row; $1\frac{1}{2}$ to 3 lbs. per acre	
BOSTON HEADING VARIETIES	
1 oz. $\frac{1}{4}$ lb. 1 lb.	10 lbs.
Bibb \$.30 \$.95 \$3.00	\$28.00
Small dark green, loose heads. Preferred by high class hotels on account of its excellent flavor. It does best in the cool months and is excellent for greenhouse growing. May be grown out of doors if planted early or so late that it can mature in cool weather.	
White Boston	26.50
The best strain of the butter head type. Frame not as large as Big Boston. Practically free from tip burn and bottom rot. Will	
hold several days in the field after maturity before bolting to seed. Plant and leaves entirely light green; heart buttery and yellow. 76 days.	
LOOSE LEAVED VARIETIES	
1 oz. ½ lb. 1 lb.	10 lbs.
Early Curled Simpson \$.30 \$.90 \$2.75	\$26.50
Early, very hardy and dependable; particularly popular for home gardens. Plant large, compact, bright light lustrous green; leaves broad, frilled, firm, crisp, sweet, of good quality. 45 days.

Early Scarlet Globe \$.20 \$.50 \$1.50 \$12.00 An excellent market garden strain for early spring or late fall planting. During the warm summer produces too long tops. Roots olive-shaped, skin rich bright scarlet; flesh white, crisp and of splendid quality. 23 days.	\$100.00
Early Scarlet Globe Short Top	
A highly colored and very attractive radish bred for green-house forcing, growing on muck soil or high ground during the summer. Tops are grey-green and small; roots oblong-globe slightly longer than broad, very firm and of bright almost true scarlet color. Very popular with market gardeners. 21 days.	100.00
Cherry Belle	100.00
Cavalier	100.00
Brightest red of Scarlet Globe type. Tops slightly larger than Short Top Scarlet Globe. Roots rich scarlet, oval and smooth, Remains in edible condition in hot weather longer than other strains. 24 days.	100.00
The best early white variety. Tops medium short. Roots 4½ to 5½ inches long, slender, tapering at the tips, very white; flesh clear white, brittle and of mild flavor. 30 days.	
Roots commonly 5 inches long, 1½ to 2 inches in diameter at the shoulder, tapered smooth and white; flesh firm, crisp and mildly pungent. 40 days.	
Round Black Spanish 20 .50 1.50 12.00 Roots round 3 to 4 inches in diameter; skin black; flesh white, crisp and of strong flavor; keep well for winter use. 56 days.	

RUTABAGA or SWEDE

1 02	z. will	plant	100	ft.	row;	3	lbs.	per	acre
------	---------	-------	-----	-----	------	---	------	-----	------

1 oz. ½ lb. 1 lb. 10 lbs. Improved American Purple Top \$.20 \$.35 \$1.00 \$ 9.00

Tops large, vigorous, blue-green. Roots 5 to 6 inches diameter; spherical, skin deep purplish-red above ground, light yellow below; tap root small; flesh yellow fine-grained, firm, crisp, mild and sweet. Often grown locally for tops as greens. 90 days.

SORREL

1 oz. will sow 150 ft. row; 5 to 8 lbs. per acre

Narrow Leaved — (Special Strain) \$.70 \$2.25 \$ 7.00

Used in salads and as greens. Sometimes called 'Sour Grass' because of its acid taste. Plant perennial, with long, slender, thick, bright green upright leaves with mildly acid flavor. 60 days.

SPINACH

1 oz. will plant 100 ft. row; 10 to 12 lbs. per acre

1 lb. 10 lbs. 25 lbs. 100 lbs. Bloomsdale Savoy, Dark Green \$.65 \$5.00 \$11.25 \$40.00 Plant very early, hardy, yigorous and rapid growing; has ten-

Plant very early, hardy, vigorous and rapid growing; has tendency to go quickly to seed in hot weather; leaves medium large, distinctly blistered "savoyed" and crumpled; thick in texture; rich, deep, medium-dark, glossy, green. For late fall or early spring sowing. 40 days.

About 3 to 5 days later than Bloomsdale, but will stand two weeks longer before bolting to seed. Plants very uniform; leaves medium large, intensely blistered or savoyed and crumpled, very thick in texture and rich, deep dark glossy green. An excellent all season spinach. 45 days.

Developed by R. E. Webb, U. S. D. A., Beltsville, Md., in cooperation with Texas stations. It is resistant to downey mildew (blue mold) and to Spinach blight. It is well savoyed, dark green, compact and upright, with leaves somewhat rounded and thick. Yield is said to surpass Dark Green Bloomsdale. It is quick growing and excellent for pre-pack. The quick-bolting habit makes it undesirable for spring planting, but it does well in the fall.

An excellent hot weather spinach. Plant very thick-leaved, glossy, dark green and well-savoyed. Slow growing and will stand 5 to 10 days at maturity without going to seed. A slow-growing summer spinach of the Long Standing type. 50 to 55 days.

Virginia Blight Resistant Savoy65 5.00 11.25 40.00

Developed at the Virginia Experiment Station. The fastest growing of the savoy types of spinach; very similar to Bloomsdale Savoy; should only be used for late fall in our section as it is the quickest bolting of all savoy types in warm weather. 40 days.

A cross of Virginia Blight Resistant Savoy and King of Denmark. Large, dark green, heavily crumpled leaves somewhat pointed. Resistant to mosaic and stands fairly well without bolting, tolerant to cold soil. Used for early fall crop, also late fall sowing, for early spring harvest or wintering over. 40 days.

Haarlem Market (Prickly Seeded Savoy)

.65 5.00 11.25 **40.00**

This variety is earlier, quicker growing and hardier than Bloomsdale Savoy as well as being remarkably resistant to blight. Being hardier than round seeded spinaches, it will stand cold and unfavorable weather.

SQUASH

SUMMER VARIETIES

	3 oz. will plant 100 hills; 3	3 to 4 lb	s. per acre
